

# //// CONSTRUCTION BMPs ////

## Protecting your job site from the rain.

**Concrete Washouts**  
Create a containment structure for your concrete washout.

**Storm Drain Inlet Protection**  
Protect all inlets around your construction site.

**Perimeter Protection**  
Protect the area inside your construction zone with perimeter protection.

**Site Stabilization**  
Prevent erosion by adding containment around areas with a slope.

**Construction Entrances/Exits**  
Build entrances properly sized for construction vehicles to remove dirt from tires.

**Chemical Storage**  
Store hazardous materials and substances under cover and use secondary containment devices.
