

## Water Usage

- The Water Tower uses less water than the average residential swimming pool.
- Water is recirculated and sanitized
- Most efficient use for a water feature
- Any improvements will only increase in water efficiency

**Average Residential Swimming pool**  
10K Gallons of water

**Gilbert Water Tower**  
5K-8K Gallons of water

- Water walls utilize approximately 1/8" depth of water flow over the wall's surface
- New concepts have less turf
- New concepts will also look to incorporate rain water harvesting from the roofs and direct it to the proposed plant material

### Existing Turf

12,260 Sq. Ft.

### Concept A

4,624 Sq. Ft.

### Concept B

6,420 Sq. Ft.
